

Cloud Cost Optimization

Are you missing an opportunity to reduce public cloud spend by 15-30%?

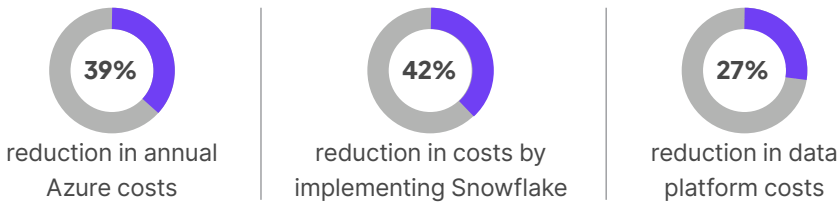

Identify opportunities to cut cloud costs and fund innovation

Many organizations suspect they are overspending on public cloud services but struggle to pinpoint exactly where the excess costs are occurring. They know that if they can reduce these costs, they can use the savings to fund innovation and prepare for future growth.

Ensono's Cloud Cost Optimization service identifies potential areas for optimization and cost savings and, using our expertise, implements those changes.

The numbers speak for themselves

We have helped clients around the world to cut their cloud costs. Notable results include:

A three-step engagement

No-cost discovery

We'll analyze your cloud environment to determine whether there is an opportunity to unlock meaningful savings.

Deep dive and recommendations

If an opportunity exists, we'll identify target resources, calculate expected savings, timescales, and impact. We'll recommend changes, prioritizing those that will deliver the biggest savings in the shortest timeframe.

No-impact execution

We'll work with your IT teams to implement the agreed-upon recommendations.

Why Ensono?

Ensono's goal is to be a relentless ally, disrupting the status quo, and enabling our clients to do great things—including reducing unnecessary spend so that you can fund innovation.

Experts in cloud FinOps & efficiency optimization with a track record of identifying and delivering significant cloud spend reduction for clients.

Over a decade of experience in AWS, Azure, GCP, private cloud, and legacy systems, our expertise enables us to excel in complex environments and solutions.

A leading global cloud managed service provider (MSP) we hold a vast and ever-increasing array of certifications, accreditations, and specializations across public clouds.

Register your interest.
